Unveiling Frontier Fund I LP: Invest, Innovate, and Secure Your Future in the United States

Phoenix, Arizona [March 18, 2024] – Intermestic Capital is thrilled to launch Frontier Fund I LP, a unique investment opportunity that offers a pathway to U.S. residency via the EB-5 Visa program. This fund is more than an investment; it's a chance to contribute to the American rural economy, promoting growth in sectors like technology, green energy, and infrastructure.

Frontier Fund I LP is now open for enrollment, inviting investors to join an exclusive group dedicated to fostering job creation and innovation in Rural America. The fund's inaugural project is a partnership with Kingsbarn Realty Capital and Travel Centers of America to develop a key travel center and logistics facility in West Wendover, Nevada. This project is set to create 1,800 jobs and boost household earnings in the region by \$167,218,000 annually.

The EB-5 Visa program, an initiative by the United States Department of Homeland Security, offers foreign investors a chance to obtain permanent U.S. residency by investing in commercial enterprises that create or preserve at least ten full-time jobs for American workers.

Intermestic Capital invites global investors to explore this unique US citizenship-by-investment program. Participation in Frontier Fund I LP offers a fast track to accelerated green card processing, principal repayment, and financial returns.

For more information about Frontier Fund I LP and the EB-5 Visa program, contact Sergio Chavez-Moreno, Operating Partner, at sergio@intermestic.com or 202-787-1545.
